

Academic Employment

- 2024– **Flatiron Research Fellow**, *Flatiron Institute*, Center for Computational Astrophysics
Investigating EPRV Sun-as-a-star datasets (e.g., KPF, NEID) to characterize stellar variability and instrumental drift towards 10 cm s^{-1} precision.
- 2018–2024 **Graduate Researcher**, *California Institute of Technology*, Astronomy Department
Built an autonomous solar feed to collect high resolution solar spectra with the Keck Planet Finder; characterized exoplanet masses with radial velocities and obliquities via classical and reloaded Rossiter-McLaughlin; helped select targets, organize observations, and analyze data for the TESS-Keck Survey.
- 2014–2018 **Undergraduate Researcher**, *University of Rochester*, Physics & Astronomy Department
Simulated type-Ia supernova spectra and built a random forest classifier to estimate DESI yield; searched for and analyzed TeV phenomena with HAWC such as possible “Fermi Bubbles” in M31 and emission from compact binaries; simulated water-Cherenkov tanks for HAWC outrigger expansion project.

Education

- 2018–2024 **Doctor of Philosophy**, *California Institute of Technology*, Pasadena, CA
Astrophysics. Advisor: Andrew Howard
Thesis: *From the Sun to the Stars: A Solar Calibrator for the Keck Planet Finder And New Frontiers in Exoplanet Obliquities*. Defended May 13, 2024.
- 2021 **Master of Science**, *California Institute of Technology*, Pasadena, CA
Astrophysics
- 2014–2018 **Bachelor of Science**, *University of Rochester*, Rochester, NY
Physics and Astronomy, *Magna cum laude* with highest distinction. Minor: Math.
Senior thesis (Advisor: Segev BenZvi): *Identifying Type Ia Supernovae in Extragalactic Spectra*

Awards and Honors

- 2024 **THREE MINUTE THESIS COMPETITION**, *People's Choice Award*, Caltech
- 2023 **RODGER DOXSEY TRAVEL PRIZE**, American Astronomical Society
- 2018 **NSF GRADUATE RESEARCH FELLOWSHIP**, National Science Foundation
- 2018 **STODDARD PRIZE**, *best senior thesis in Physics & Astronomy*, U. of Rochester
- 2018 **JANET FOGG PRIZE**, *awarded to one senior for dedicated departmental service*, U. of Rochester
- 2018 **UNDERGRADUATE TEACHING AWARD**, U. of Rochester
- 2017 **BARRY M. GOLDWATER SCHOLARSHIP**, Goldwater Foundation
- 2017 **AWARD FOR EXCELLENCE IN PROGRAMMING**, for “*Earth Hour*”, U. of Rochester
- 2016, 2017 **CONTINUING STUDENT SCHOLARSHIP**, U. of Rochester
- 2014 **BAUSCH AND LOMB HONORARY SCIENCE AWARD & SCHOLARSHIP**, U. of Rochester

Skills and Training

Observing

- Observing on professional astronomical telescopes: 50 nights on Keck (48 HIRES, 2 KPF), 1 night on the Palomar 200” (WIRC+Pol/TripleSpec), 8 nights at C.E.K. Mees Observatory
- Managing big surveys: I scheduled $\sim 10^4$ HIRES radial velocity observations for 104 stars in the TESS-Keck Survey across 298 Keck nights during 2019–2022
- Experience leading tours and stargazing events at observatories (~ 40 nights at C.E.K. Mees Observatory) and in the public (sidewalk astronomy, CaltechAstro outreach lecture series)

Statistics

- Proficiency with advanced statistical techniques including hierarchical Bayesian methods, Gaussian Processes, MCMC, HMC, WAIC/lppd, mixture models

Hardware

- Familiarity with EPRV spectrographs, testing during commissioning, assessing detectors, drift, calibration sources, and wavelength solutions
- Experience in design, construction, alignment, and testing of opto-mechanical systems
- Experience with control systems, state machines

Software

- Python (expert) and JAX (proficient), Mathematica, SQL, UNIX shell scripting (Bash), Docker, SLURM, SAOImage DS9, TheSky6, CCDSoft, CCDStack

Student Mentorship

2025 **Lyniya Edwards**, Masters Student, *CUNY*

For her Master's Thesis, Lyniya is investigating solar flares using EPRV solar data (KPF, NEID) to construct a flare-sensitive line list and probe flare propagation throughout the solar atmosphere.

2025 **Kate Hobbs**, PhD Student, *Queen's University Belfast*

As part of the [CCA Predoc program](#), Kate applied spectral differencing analysis to solar data from KPF, NEID, and EXPRES to isolate and correlate pixel-level flux variability with SDO images to classify families of lines sensitive to various forms of stellar activity.

2023 **Xuezheng Li**, Undergraduate, *Pasadena City College*

As part of the [Caltech Connection program](#), Xuezheng researched the exoplanet measurement techniques, learned Python, and explored fitting real radial velocity and transit data to discover an exoplanet.

2021 **Jared Siegel**, Undergraduate, *University of Chicago*, (currently PhD student at Princeton)

As a Caltech SURF student, Jared wrote a line-by-line radial velocity pipeline and derived a novel activity indicator based on the depth of individual spectral lines which outperformed traditional activity indicators in reducing the RMS of α CenB HARPS RVs.

2020 **Aanica Gonzales-Rogers**, Undergraduate, *California Institute of Technology*

As a Caltech SURF student, Aanica explored the detectability of exoplanets in wide orbits using *orbitize!* and simulated astrometric measurements anticipated in future Gaia data releases.

Teaching Positions

TA, Astronomy Department, *California Institute of Technology*

2020 Ay 124: Structure and Evolution of Galaxies, Ay 105: Optical Instrumentation Lab (remote)

2019 Ay 122a: Optical/IR Measurements and Instrumentation

TA, Physics and Astronomy Department, *University of Rochester*

2018 AST 142: Elementary Astrophysics (Honors)

2017 AST 111: The Solar System & Its Origin, AST 142: Elementary Astrophysics

2016 PHY 141 Lab: Mechanics (Honors), AST 102: Relativity, Black Holes, and the Big Bang

2015 AST 106: Cosmic Origins of Life, AST 104: The Solar System

Service

2021–2023 Organizer/facilitator, [Respect is a Part of Research](#), California Institute of Technology

Presented material and facilitated group discussions for a peer-lead sexual harassment/sexual assault prevention workshop for incoming first year graduate students during orientation.

2021–2022 Teaching Assistant, [Code/Astro](#)

Assisted students with writing their Python packages throughout the software development workshop.

- 2019–2021 Volunteer, [FUTURE](#), California Institute of Technology
Co-ran a CV/SoP writing workshop for undergraduate women and nonbinary students
- 2019–2020 Teaching Assistant, [Intro2Astro](#)
Presented lessons on Bayesian statistics, model fitting, and model comparison.
- 2018 Peer Advisor, [College Center for Advising Services](#), University of Rochester
Advised students with their majors, course selection, research opportunities, networking, independent study, study abroad, applying for grad school, and more.
- 2015–2018 Tour Guide, [C.E.K. Mees Observatory](#), University of Rochester
Presented the history of the observatory, current research at UR, and operated the 24-inch telescope.

Telescope Time

- 2026 Keck-I Telescope: KPF (0.75 nights, PI NASA program N127)
- 2023 Keck-I Telescope: KPF (5.75 nights, PI[†], 2 nights co-I)
[†]Functionally PI, but officially “PI: Howard” as Caltech grad students cannot PI Keck proposals

Selected Presentations

- 2025 EPRV 6, Porto, Portugal (contributed talk)
- 2024 Extreme Solar Systems V, Christchurch, New Zealand (contributed talk)
- 2024 AAS 243, New Orleans, LA (dissertation talk)
- 2023 Keck Science Meeting, Berkeley, CA (contributed talk)
- 2023 Exoplanets Seminar, Princeton University (invited talk)
- 2023 Dix Planetary Science Seminar, Caltech (talk)
- 2023 EPRV 5, Santa Barbara, CA (poster)
- 2023 Sun-as-a-star workshop, Flatiron Institute/CCA (invited talk)
- 2023 AAS 241, Seattle, WA (contributed talk #323.01)
- 2022 ERES VII, The Pennsylvania State University (contributed talk)
- 2020 AAS 235, Honolulu, HI (talk)
- 2019 Keck Science Meeting, UCLA (contributed talk)
- 2019 Extreme Solar Systems IV, Reykjavik, Iceland (poster #309.08)
- 2018 AAS 231, National Harbor, MD (poster #250.05)
- 2016, 2017 Rochester Symposium for Physics Students (talk)

Press and Public Media

- 2023 “[Is there life beyond Earth? The Keck Planet Finder could tell us.](#)” Interviewed for article on KPF and the Solar Calibrator for Dell (**Rubenzahl**+23, PASP)
- 2021 “[The Strange Case of the Misplaced Cotton Candy World](#)” Interviewed for article on WASP-107 b for supercluster.com (**Rubenzahl**+21, AJ; Piaulet, Benneke, **Rubenzahl**+21, AJ)
- 2020 “[Measuring the Speed of Stars](#)” Presented a public talk for CaltechAstro outreach on YouTube

Publications

Refereed 5 first author (+1 in review), 5 second/third author, 55 nth author

Non-Refereed 1 first author, 1 second author, 2 nth author

Selected peer-reviewed journal publications

- 2026 **R. A. Rubenzahl**, S. Hattori, S. Särkkä, W. M. Farr, J. K. Luhn, & M. Bedell, “Scalable Gaussian Processes for Integrated and Overlapping Measurements Via Augmented State Space Models”, *arXiv e-prints*, arXiv:2601.02527

TESS-Keck Survey peer-reviewed publications

I contributed substantially to the TKS infrastructure by co-developing the sample construction algorithm (Chontos+22, AJ), constructing the nightly target lists (298 calendar nights), and co-leading the RV fitting of the HIRES/APF data for all TKS systems (Polanski+2024).
